

Letter of Interest for: Application Developer
Douglas Pleger / Full-Stack Developer

I believe I would be a great fit for this position! I'm a fresh developer out of school, versed with a well-rounded toolkit. I'm very eager to get out into the work-field and challenge myself to keep growing. I would love to get the opportunity to work in a position where I can make a difference in the community! Working for the state of Washington (as your slogan states) is work that truly matters.

I already have solid experience with strong languages like JavaScript, Python and Ruby. I'm familiar with frameworks like Django and Ruby on Rails. I have strong databasing skills, having used MySQL, MongoDB and ActiveRecord. I have developed using RESTful methods and have experience in version-control via GitHub and StamPlay.

As you'll also see, in my resume, I have a very strong customer-centric background. I enjoy communicating with people and never let the pressure of a constantly-changing environment get to me. I'm articulate, well-organized and will never turn down an opportunity to help my team and company. Or, in this case, my beloved state.

Thank you for taking the time to read my letter of interest! I really hope to hear from you.
